PROFILE STATEMENT

Data Engineer with hands-on experience building predictive models, automation pipelines, and cross-functional data systems across multinational telecommunications and technology enterprises. Proficient in Python, SQL, and cloud-based workflow automation, with a track record of translating raw operational data into production-ready systems. Undergraduate thesis on hybrid time-series forecasting accepted for IEEE conference publication.

EXPERIENCE

Data Scientist – B2B Operations and Analytics

PT. Indosat Tbk

Apr 2026 – Present
Jakarta Selatan, Indonesia

- **Developed** predictive models in Python that improved B2B workflow decision accuracy by **15%**, processing data across **12+** operational metrics for the B2B Operations team.
- **Built** interactive dashboards adopted by **8** cross-functional team members to monitor real-time enterprise metrics, cutting manual reporting time by **5 hours/week**.
- **Maintained** data quality and governance standards across pipelines within a daily Agile development cycle.

Intelligent Automation Configurator Intern

PT Telekomunikasi Selular

Jul 2025 – Sep 2025
Jakarta Selatan, Indonesia

- **Built** two AI-based agents (PEVITA & FEVITA) that automated **40%** of manual financial routing tasks across **3** departments, cutting processing time from **48 hours** to **under 2 hours**.
- **Designed** and documented API-based testing workflows covering **25+** endpoints, improving system reliability by **18%**.
- **Created** operational runbooks and monitoring dashboards used by **4** project teams to track platform performance over **3** months.

Business Analyst Intern

PT Telkom Indonesia (Persero) Tbk

Jan 2025 – Feb 2025
Jakarta Pusat, Indonesia

- **Redesigned** onboarding workflows for **5** teams, reducing process time by **25%** through optimization-focused SOPs.
- **Evaluated** integration performance metrics across **15+** touchpoints, identifying **6** procedural gaps that accelerated cross-departmental alignment.

AIoT Engineer Intern

PT XLSMART Telecom Sejahtera Tbk

Jul 2024
Jakarta Selatan, Indonesia

- **Analyzed** real-time IoT network metrics (RSSI, RSRQ, RSRP, SINR) across **50+** sites, identifying **8** optimization opportunities within data pipelines.
- **Translated** technical network parameters into business-oriented reporting, improving reliability reporting accuracy by **20%**.

Additional Experience

- **McKinsey & Company** – Forward Fellowship Program Participant (Apr–Jun 2026); **ITB Career Center** – Machine Learning Engineer Intern (Apr–Jun 2025); **Teaching Assistant**, Information Security & IoT, STEI ITB (Feb–Jun 2026); **Tradeasia International** – System & Data Research Analyst Intern (Jan–Feb 2026).

SELECTED TECHNICAL SKILLS

- **Languages & Data:** Python (Pandas, Scikit-learn), SQL, R, Git
- **ML & Forecasting:** Time-series Forecasting (ARIMA), GenAI (LLM & RAG), Model Explainability (SHAP)
- **Automation & Systems:** Workflow Automation, IoT System Integration, Linux/Unix, Shell Scripting
- **Delivery & Governance:** Agile & Waterfall SDLC, Data Governance, Power BI, Requirements Gathering

SELECTED PROJECTS

Undergraduate Thesis | Hybrid Random Forest–ARIMA Model for Jakarta PM₁₀ Forecasting 🐙

Feb 2026

- Built a hybrid Random Forest–ARIMA model with time-series feature engineering on 15 years of Jakarta air quality data (2010–2025); accepted for presentation at IEEE FMLDS 2026, graded A.

Charissa – Conversational Data Engineering Assistant | Python, FastAPI, Docker, Next.js, Google Gemini 🐙🌐

Jul 2026

- Solo developer; built an LLM-powered data platform letting organizations analyze confidential data via AI without it leaving their infrastructure; deployed end-to-end on Vercel and a self-managed backend.

SELECTED AWARDS AND ACHIEVEMENTS

Google APAC Solutions Challenge 2025

Jun 2025

- Top 10 Asia-Pacific Finalist, recognized by Google and ADB for Simutrade, an AI-powered SME trade platform.

Young Entrepreneur Days UI (YED UI) 2025

Nov–Dec 2025

- 2nd Winner, Business Case Competition for University Student, hosted by BEM FMIPA Universitas Indonesia.

Pra-Gemastik ITB 2024

Jun 2024

- 1st Place, Smart Device, Embedded System & IoT Competition, representing ITB at the national level.

EDUCATION

Institut Teknologi Bandung

Kota Bandung, Indonesia

B.Sc. in Information Systems & Technology – Specialization: Cyber Security and Privacy

2022 – 2026

National University of Singapore

Singapore

Summer Programme, Entrepreneurship / Startup Building – ASEAN SPARK Fellow (full scholarship)

2026 – 2026
